Dear Sir/Madam

RE: Professional Reference – Acoustic Logic Consultancy

I have known Matthew Palavidis in a professional capacity since late 2008 as the managing director of Acoustic Logic Consultancy.

Brookfield Multiplex have employed Acoustic Logic Consultancy for all our major current UK projects which require the services of a professional acoustician with the following projects being the ones which I have personally worked together with Matthew to deliver our needs and the needs of our client:

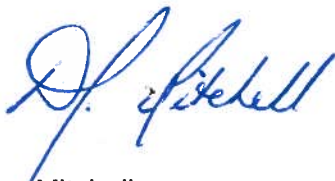

- The Pinnacle
- 100 Bishopsgate

For each of these projects Acoustic Logic Consultancy provided both nuisance monitoring services and design input for the development.

The quality of Acoustic Logic's work is without question and as such I would have no reservations instructing further works to Matthew and his company for our future developments. It goes without saying I would highly recommend Acoustic Logic Consultancy to other clients for future work they may have that require their expertise, attention to detail and focus on best practice.

Should you require any further information or wish to discuss this reference further, please do not hesitate to contact me.

Yours sincerely

Dean Mitchell
Construction Director
Brookfield Multiplex Construction Europe Limited
